SUMMARY

Computer Science undergraduate specializing in iOS development with hands-on experience building native applications using Swift and SwiftUI. Experienced in integrating machine learning capabilities into iOS applications using Core ML across 4+ projects.

WORK EXPERIENCES

- Junior iOS Developer, Apple Developer Academy @BINUS Tangerang

Mar 2026 - Present

 - Developed 4+ native iOS applications using Swift and SwiftUI, covering product ideation, implementation, and user validation.
 - Implemented iOS features using Core ML, MapKit, CoreLocation, and CoreHaptics for on-device ML, location-based navigation, and haptic interactions.
 - Collaborated with developers, designers, and business members to develop and iterate applications based on user feedback and product requirements.
- Multimedia Coach, PT Digikidz Indonesia

Jul 2025 - Jan 2026

 - Delivered 40+ technology lessons covering software development, AI, robotics, game development, and IoT to students aged 7–18.
 - Mentored 60+ students through hands-on projects, contributing to a 25% improvement in problem-solving and creative-thinking performance based on student evaluations.
- Laboratory Teaching Assistant, Bina Nusantara University

Sep 2024 - Dec 2024

 - Delivered hands-on C programming tutorials and laboratory exercises for undergraduate students.
 - Evaluated assignments and quizzes for 70+ students, providing technical guidance and monitoring learning progress.

SELECTED PROJECTS

- HoMould: Indoor Mold Risk Detection & Assessment

Jul 2026 - Aug 2026

 - Built an iOS app for indoor mold risk assessment using SwiftUI and Core ML, combining environmental and visual indicators for real-time prediction.
 - Integrated an on-device machine learning classifier into the iOS prediction workflow for real-time risk assessment.
- K-SINI: Indoor Navigation for Indonesian Commuter Line Stations

Jun 2026 - Jul 2026

 - Implemented an indoor navigation prototype for KRL stations, providing checkpoint-based turn-by-turn guidance through SwiftUI.
 - Implemented location detection, live compass guidance, and haptic feedback using native iOS frameworks.
- Petik.in: Computer Vision-Based Guitar Learning App

Apr 2026 - May 2026

 - Built an iOS guitar learning application using SwiftUI and computer vision to analyze user performance during practice.
 - Integrated on-device ML capabilities to provide real-time feedback for guitar learning.

EDUCATION

- Bina Nusantara University - Jakarta, Indonesia

Sep 2023 - Present

Bachelor of Computer Science | Expected 2027
GPA: 4.00/4.00

 - Dean's List 2025, School of Computer Science, BINUS University
 - Best Research Paper Presentation Award, ISCBI 2026

LEADERSHIP AND ORGANIZATIONAL EXPERIENCES

Learning and Training Staff

Aug 2024 - Oct 2025

Bina Nusantara Computer Club

- Coordinated and managed the LnT Regular Class program with over 200 active participants, ensuring smooth planning, scheduling, and execution across all sessions.
- Supported the delivery of 14+ classes annually by collaborating with praetorian and other subdivision members.
- Assisted the manager in implementing subdivision work programs, contributing to a 30% increase in class participation

Product and Curriculum Core Team

Sept 2024 - Oct 2025

Google Developer Group on Campus BINUS @Malang

- Organized and managed technology-themed events for GDG members in collaboration with the event manager.
- Coordinated at least 2 events per semester, engaging 50+ participants on average.
- Selected qualified speakers, secured schedules, and ensured smooth event execution within planned resources.

Freshmen Leader and Freshmen Partner - First Year Program B2028

July 2024 - May 2025

Student Development Center BINUS @Malang

- Led and mentored a group of 8+ freshmen, ensuring smooth adaptation to university life through consistent academic support and weekly check-in sessions.
- Promoted soft skill development and freshmen engagement through informal sessions and peer discussions.
- Built strong interpersonal connections and served as a reliable point of contact, contributing to a notable increase in student confidence and participation during their first semester.

PUBLICATION

Molecule World: Enhancing chemistry education through web-based augmented reality using Assemblr

Nov 2024

- Publisher: Elsevier
- DOI: 10.1016/j.procs.2024.10.354

Utilizing AI-Powered Anomaly Detection to Counter DDoS Attacks: A Comparative Study of Random Forest and XGBoost Algorithm in Network Protection

Dec 2025

- Publisher: IEEE
- DOI: 10.1109/ICORIS67789.2025.11296019

Harnessing Transformer-Based Deep Learning for Online Discourse Classification in Indonesia: A Comparative Study of RoBERTa and IndoBERT Models

May 2026

CERTIFICATIONS

Back-End Development By Bina Nusantara Computer Club

Sept 2024

Azure AI Fundamentals By Microsoft

March 2025

Data Visualization By FreeCodeCamp

May 2025

Machine Learning with Python By FreeCodeCamp

May 2025

SKILLS AND AWARDS

- Technical Skills:** Swift, SwiftUI, UIKit, Core ML, MapKit, CoreLocation, CoreHaptics, Xcode, Git, Python
- Awards:** Finalist, The Idea Business Pitching Competition (2024); Finalist, Electra 12 National Olympiad (2023)
